COOLING RANGE

Advanced Automotive Technology

Thermostats, Thermostat Gaskets and Radiator Caps

Tridon Australia Pty Ltd is a 100% Australian owned company and supplies an extensive range of the highest quality products to the automotive, original equipment, industrial and hardware markets in Australia and New Zealand.

Quality and customer service are of utmost importance and Tridon's manufacturing and distribution facilities are all ISO9002/OS9000 quality accredited and ISO14001 environmentally accredited.

Tridon offers the most extensive range of high quality engine thermostats and gaskets in the market including heavy-duty commercial applications. All Tridon thermostats are factory calibrated and tested ensuring 100% operation prior to purchase.

Tridon radiator caps are all coolant recovery style and manufactured to perform to original equipment standards.

High Flow Thermostats

High flow thermostats improve cooling system performance. They have a larger valve and allow approximately 30% more coolant to flow to the radiator than standard type thermostats.

High flow thermostats eliminate any need for using cooler temperature thermostats as a temporary cure for overheating problems as was done in the past.
