

THE NEW

Dart SHP block

is the ideal starting point for high-performance and heavy-duty applications up to 600 horsepower.

PRECISION MACHINED

Made in the USA on all new tooling & machined on Dart's dedicated CNC machining centres, these blocks have performance features not found on production GM blocks & are such good value you'll never mess with a new or used O.E block again.

FEATURES:

- Available in 4.00" & 4.125" bore sizes semi finished ready to hone for piston clearance & preferred bore finish.
- Decks, lifter bores, cam & main bearing tunnels are all finish machined.
- Stock 9.025" deck height.
- 350 size main tunnel with priority main oiling system.
- The SHP block's refined oiling system eliminates the need of a high volume oil pump.
- Rigid .625" deck thickness & blind head bolt holes enhance head gasket sealing.
- Features ductile iron 4 bolt centre caps with splayed outer bolts.
- 2 bolt end caps allow the use of stock style oil pans.
- Uses a 2 piece rear main seal.
- Clearance notched for 3.750" stroke crankshafts..
- Lifter valley has provision for flat tappet or OEM style roller lifters.
- Uses stock starter, oil filter & clutch pivot locations.
- Uses a standard small block timing cover & 1981-1985 oil pan with RHS dipstick.
- Has provision for mechanical fuel pump & uses a standard length pushrod.
- Provision for knock sensors for EFI applications

Part number	Bore	Main tunnel	Deck height
CC31161111	4.00"	350	9.025"
CC31161211	4.125"	350	9.025"

Demand is high, we suggest you pre order yours today to avoid disappointment.

Don't forget, Precision can supply everything you need to build a brand new small block Chevy. Dart cylinder heads - ARP fasteners - Canton oil pans & valve covers - Dynotec or Lunati Voodoo camshafts - Melling or Speed Pro oil pumps - Scat crankshafts - Scat or Carrillo conrods - Durapro or Felpro gaskets- Hypatec, Speed Pro, SRP or JE pistons - Hastings, Speed Pro or JE rings - King, Speed Pro, Clevite & Durabond bearings - Ferrea valves - Kmotion valve springs.
