

ATI manufactures a multitude of

HIGH performance parts including Torsional Super Dampers and Flexplates.

ATI's commitment to NHRA & IHRA racing has allowed the company to maintain a prominent position on the cutting edge of high performance component design and manufacturing. A full range of ATI Super Dampers and Flexplates products are available from Precision International.

Flexplates

ATI Flexplates are created from custom drawn SFI-spec chromoloy steel.

The flexplates are double MIG/TIG welded for additional strength and lasting precision pass after pass. Each ATI flexplate is manufactured and toleranced from OEM drawings to ensure a precise fit and location.

Each plate is quality inspected to EXCEED the flatness and run-out tolerances of the OEM units and is precision balanced on Hines digital equipment with a resolution of 0.10 oz-in.

Super Dampers

The patented ATI Super Damper is available for high performance Ford, Chevy and sport compact engines.

Don't build a time bomb by installing a \$200 damper on a \$20,000 engine! Use ATI!

- Eliminates torsional crankshaft vibrations
- Exceeds SFI 18.1 specs
- Black zinc chromate finished
- Tunable, rebuildable, and extremely efficient at ALL RPM
- Laser engraved 360° timing marks
- Used by top NASCAR & V8 Supercar teams
